

RESIDENTIAL AND COMMERCIAL  
BUILDING SERVICES

## CASE STUDY

### PROJECT DETAILS

#### Location

75 Mackellar Street  
Emu Plains

#### Sector

Education

#### Client

McCarthy Catholic College

#### Project Manager

Wayne Stepherson

#### Supervisor

Glenn Amies

A complete strip-out of the existing woodwork room and its contents carried out prior to our renovation works commencing to freshen up the space, making it an enjoyable environment for the Junior and Senior students undertaking woodwork as part of their studies.

We commenced with a freshen up of the structural steel work/exposed trusses, a new coat of paint including the existing doors and associated jambs, and a brand-new mechanical ventilation system was installed for all machinery to be linked to, for dust and debris.

The existing floor received a new coat of non-slip paint and line marking tape installed to mark-up machinery work zones.

## CASE STUDY

### THE RESULTS

REPAIRS • MAINTENANCE • RENOVATIONS • MODIFICATIONS

Our specialist cabinet maker manufactured all of the new woodwork tables and vices to the specifications provided by the architect. New stainless-steel trough and eye wash stations were installed to meet compliance, and a brand-new drill press and router table were supplied and installed by AJ Grant as part of the project.

To finalise the project, AJ Grant supplied and installed a brand new 75" TV along with a silverscreen glass white board for both the teachers and students to use.

During the entire process our clients were briefed weekly with work updates and walk throughs. The works were completed within the initial set time frame of 6 weeks to ensure the students had full access upon returning to school.

- If you have a creative challenge or renovation / repair project, we'd love to hear from you -
